NEW SOFTWARE FOR FLIGHT PLAN AND NOTAM

The Belize Department of Civil Aviation, through the Aeronautical Information Management (AIM), communicates to users of aeronautical information, that as of November 14, 2016:

- 1- AIM is implementing a new automated flight plan system, so we ask you to present these properly completed documents as established in ICAO Document 4444, otherwise they will be returned for the respective revision.
- 2- This same automated system implemented throughout Central America by COCESNA, will also be for the distribution and reception of NOTAM.
- 3- Because this new software is very modern, it has the capacity to issue the Pre-flight information bulletin (PIB). PIB is the way to present information NOTAM, ASHTAM and MET in force, prepared before the flight, that is important for its operations. The PIB includes informative coverage of the entire route, including departure, arrival and alternate airports.
- 4- PIB will be available on request.

All users are reminded to visit this AIS office in accordance with the international and national standards of ICAO.
