GLOBAL REPORTING FORMAT (GRF)

The Belize Department of Civil Aviation (BDCA) hereby notifies the aviation public that a project to implement the Global Reporting Format (GRF) has been established. This is in compliance with the newly implemented procedures by the International Civil Aviation Organization (ICAO) which have been integrated into the Belize Civil Aviation Regulations (BCAR). This format facilitates the standardized evaluation and notification of runway surface conditions for aircraft operations, particularly in relation to precipitation-induced effects. Its purpose is to enhance flight crew awareness regarding aircraft performance during the take-off and landing phases. The implementation of these procedures will involve a series of activities conducted by the regulatory authority, including training sessions and simulation exercises for service providers. The effective date for the implementation of the Global Reporting Format into the aviation industry is November 20, 2024.

For further information, please direct your inquiries to info@civilaviation.gov.bz or visit the BDCA offices for detailed clarification.
